

CHANG YAO HSIEN (VICTOR)

Senior Full-Stack Engineer | Go / TypeScript / React / Real-Time Systems

t790219520@gmail.com | [linkedin.com/in/yao-hsien-chang](https://www.linkedin.com/in/yao-hsien-chang)

PROFILE

Senior Full-Stack Engineer with 7+ years of experience building scalable web platforms, cloud-native services, and real-time applications. Experience across TypeScript, React, Vue, Node.js/NestJS, Golang, WebSocket, NATS, PostgreSQL, Redis, AWS, and Docker, with ownership across system design, architecture decisions, DevOps automation, and cross-functional delivery. Proven track record leading engineering collaboration across Hong Kong, Taiwan, and Vietnam.

EXPERIENCE

Cypherlab Sdn. Bhd. | Senior Full-Stack Engineer

Feb 2026 - Aug 2026

Real-time sports and e-sports betting backoffice platform

Stack: TypeScript, React, WebSocket, NATS

- Built and maintained full-stack backoffice features for real-time sports and e-sports betting operations, collaborating across frontend and backend workflows.
- Implemented real-time market state updates using WebSocket and NATS to propagate betting-market changes across connected services and backoffice clients.
- Developed World Cup market-operation features for closing betting markets and overriding odds, enabling operators to react quickly to live event changes.

Mediconcen | Senior Full-Stack Engineer

Feb 2022 - Jan 2026

Hong Kong-based InsurTech delivering blockchain-enabled health insurance solutions

Stack: TypeScript, React, NestJS, Golang, AWS (EC2, ECS, S3), PostgreSQL, Redis, Docker

- Led development of mission-critical full-stack platforms for insurance claim processing used daily by clinics and insurers across Hong Kong.
- Designed and delivered scalable NestJS microservices for eligibility verification, copayment calculation, OCR orchestration, and insurer API integration.
- Built an end-to-end automated OCR pipeline and optimized system performance through database query tuning, caching, and frontend rendering improvements.
- Served as technical lead and cross-country bridge for engineering teams in Hong Kong, Taiwan, and Vietnam.

Paradromix | Frontend Engineer

Jul 2021 - Feb 2022

Government-grade crypto management systems and enterprise web platforms

Stack: TypeScript, Vue, Nuxt (SSR), AWS, Nginx, Docker

- Led frontend development for marketing platforms, landing pages, and campaign sites, improving SEO and conversion performance.
- Designed and built a custom CMS platform enabling non-technical teams to manage dynamic content efficiently.

ULIC TEK | Software Engineer

Jan 2018 - Jul 2021

Image processing systems and industrial desktop-web hybrid solutions

Stack: Vue, TypeScript, Angular, C++, MFC, OpenCV

- Designed and implemented image recognition algorithms for industrial and graphic applications using C++ and OpenCV.
- Modernized legacy desktop applications by integrating web-based UI layers and delivered custom web solutions for entertainment and creative industries.

TECHNICAL SKILLS

Languages: TypeScript, Golang, JavaScript, C++

Frontend: React, Vue, Next.js, Nuxt, Angular, HTML5, CSS3

Backend, Messaging & Data: Node.js, NestJS, Express, REST APIs, WebSocket, NATS, PostgreSQL, Redis, MySQL, MongoDB

Cloud & Architecture: Microservices, API Design, AWS, Docker, CI/CD, Linux, Nginx

Tools & Languages: Git, Jira, Figma, Postman, VSCode | English, Mandarin, Basic Japanese

EDUCATION

Bachelor of Chemistry - Chia Nan University of Pharmacy and Science, 2017
