

CHANG YAO HSIEN (VICTOR)

SENIOR FRONTEND ENGINEER | REACT · TYPESCRIPT · REAL-TIME WEB APPLICATIONS

t790219520@gmail.com ◇ linkedin.com/in/yao-hsien-chang

PROFILE

Frontend-focused Senior Software Engineer with 7+ years of experience building production web applications with **React, TypeScript, Vue, and modern frontend architecture**. Experienced in **real-time operator platforms, SSR applications, legacy frontend modernization, and complex business workflows**. Strong backend experience with Node.js/NestJS, Golang, PostgreSQL, and AWS enables effective end-to-end collaboration and production problem solving.

EDUCATION

Bachelor of Chemistry, Chia Nan University of Pharmacy and Science

Graduated 2017

EXPERIENCE

Cypherlab Sdn. Bhd.

Feb 2026 - Aug 2026

Senior Full-Stack Engineer

Real-time sports and e-sports betting backoffice platform

Tech Stack: TypeScript, React, WebSocket, NATS

- Built **React and TypeScript backoffice workflows** for live sports and e-sports operations across frontend and backend services.
- Modularized **WebSocket message handling** by separating socket events into feature-based modules and centralizing message management, making real-time flows easier to maintain and extend.
- Delivered live-event controls for **market closure and odds overrides**, enabling operators to react quickly to time-sensitive market changes.

Mediconcen

Feb 2022 - Jan 2026

Senior Full-Stack Engineer

Hong Kong-based InsurTech delivering digital health insurance solutions

Tech Stack: TypeScript, React, NestJS, Golang, AWS (EC2, ECS, S3), PostgreSQL, Redis, Docker

- **Modernized a legacy React codebase** by migrating class components to functional components with Hooks, improving maintainability and reducing frontend technical debt.
- Implemented **infinite scrolling and list virtualization** for large data-heavy views, loading paginated API results on demand while rendering only visible items to improve scrolling performance and user experience.
- Built and maintained clinic-to-insurer workflows covering **eligibility verification, copayment calculation, claim submission, and insurer API integration**.
- Owned **end-to-end onboarding and system integration** for new clinic and insurer partners, from requirement clarification and task breakdown through development, testing, release, and maintenance.
- Partnered with Product Managers to clarify business workflows, identify technical constraints, align scope, and translate requirements into actionable engineering tasks.

Paradromix

Jul 2021 - Feb 2022

Frontend Engineer

Government-grade crypto management systems and enterprise web platforms

Tech Stack: TypeScript, Vue, Nuxt (SSR), AWS, Nginx, Docker

- Led frontend delivery for web platforms and campaign sites, with focus on **SSR, SEO, and maintainable UI architecture**.
- Designed and built a **custom CMS platform** enabling non-technical teams to manage dynamic content efficiently.

ULIC TEK

Jan 2018 - Jul 2021

Software Engineer

Image processing systems and industrial desktop-web hybrid solutions

Tech Stack: Vue, TypeScript, Angular, C++, MFC, OpenCV

- Modernized legacy desktop applications by integrating **web-based UI layers** and delivering custom desktop-web hybrid solutions.
- Designed and implemented image recognition and processing algorithms for industrial and graphic applications using C++ and OpenCV.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Vue, Nuxt, HTML5, CSS3

Frontend Engineering: React Hooks, SSR, SEO, Real-Time UI, WebSocket, REST API Integration, Component Architecture

Backend & Data: Node.js, NestJS, Express, Golang, NATS, PostgreSQL, MySQL, Redis, MongoDB

Cloud & DevOps: AWS, Docker, CI/CD, Linux, Nginx | **Languages:** English, Mandarin, Basic Japanese
